Vorwort

Für die Geschichte des frühmittelalterlichen germanistischen Rechts sind die Volksrechte der einzelnen germanischen und deutschen Stämme von besonderer Bedeutung. Auf Grund jahrhundertelanger Beschäftigung mit ihnen liegen sie der Gegenwart in brauchbaren, wenn auch teilweise noch verbesserungsfähigen wissenschaftlichen Editionen vor. Es fehlt ihnen aber ausnahmslos noch ein vollständiger Wortindex.

Dieser Mangel macht sich besonders stark bemerkbar bei den Leges Langobardorum. Zum einen befinden sie sich von der deutschen Rechtsgeschichte her gesehen in einer gewissen Randlage. Zum anderen verdienen sie sowohl wegen ihres Umfangs als auch wegen ihres Inhaltes besondere Aufmerksamkeit.

Aus diesem Grund ist für sie ein Wörterverzeichnis erstellt worden, das sich bemüht, alle Wörter buchstabengetreu zu erfassen, ohne dass dabei die ganz strengen philologischen Maßstäbe angelegt wurden. Zugrundegelegt ist Bluhme, F., *Edictus ceteraque Langobardorum Leges*, 1869, S. 1225. Beigezogen wurden weiter *Leges Langobardorum 643-866*, bearb. v. Beyerle, F., Mit einem Glossar von Schröbler, I., 1962, *Die Gesetze der Langobarden*, übers. v. Beyerle, F., 1962ff., Bruckner, W., *Die Sprache der Langobarden*, 1895, Löfstedt, B., *Studien über die Sprache der langobardischen Gesetze*, 1961, Rhee, F. van der, *Die germanischen Wörter in den langobardischen Gesetzen*, 1970. Erfasst sind schätzungsweise 60000 Belege, die sich auf vielleicht 3000 Wörter verteilen.

Mit ihrer Indizierung ist ein weiteres Hilfsmittel zur Erforschung der frühmittelalterlichen Geschichte geschaffen. Seine Erstellung ist nur durch die Mithilfe mehrerer meiner Gießener Mitarbeiter, insbesondere von Herrn Dietrich Joswig, möglich gewesen.

Um der modernen Technik Rechnung zu tragen, ist das Wörterverzeichnis durch Frau Bonnie Yen, der ich für ihren Einsatz sehr herzlich danke, gescannt und damit weltweit maschinell lesbar gemacht worden.
